ANNEX

the No. B-021/2018 EU Type-Examination Certificate
for the No. B-021/2018-K1/2020(E) supplement

Certified personal protective equipment:

New version of the personal protective equipment specified in the EU Type-Examination certificate B-021/2018:

Name: ***Antistatic clothing to protect against heat, flame and liquid chemicals***

Identifier: - waist trousers: ***Dávid-Iva-dn-18-03***

Applicant (manufacturer):

SIRIUS PRODUKT Ltd.

Címe: H-1044 Budapest, Szilaspaták sor 42/b. 2. em. 13.

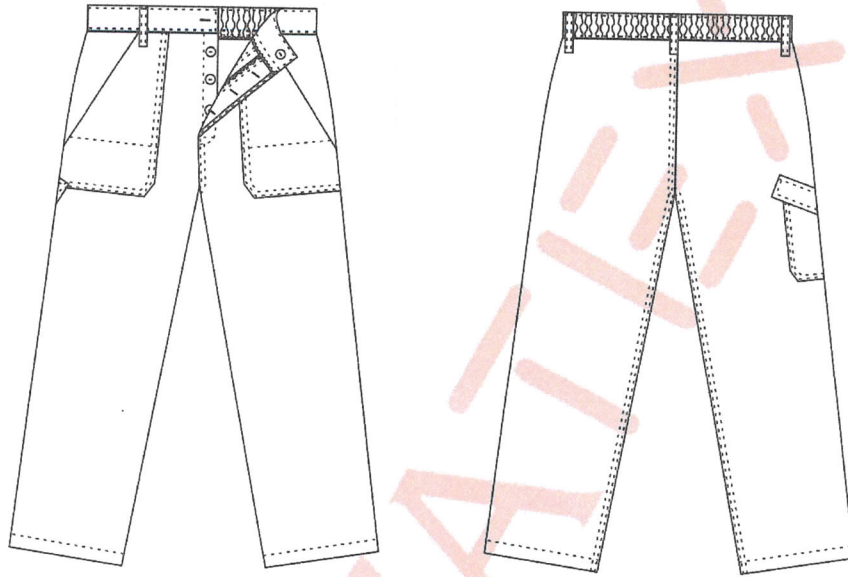

Description of the protective equipment:

Waist trousers (Dávid-Iva-dn-18-03):

The front of the trousers is closed at the centre line of the covered slit and the waistband with buttons, max. 6.5 cm apart. Bottom of the five piece belt loop are stitched in the belt band seam line and the top part stitched on the belt band. Wideness of the trousers is adjustable with the elastic band with laced back of the belt band. At the right and left front, there is a patch pocket with sloping corners, which bottom part is reinforced (double layered). The pocket flap and the top of the pockets is seamed in the belt band and the one side is seamed the outer seamline. The pocket flaps cover the pocket hole with an overlapping of 2 cm. At the right rear leg at the thigh part, at the outer side seam there is a flap tool pocket with a sloping corners and a slanted opening, which closure a press button and is stitched with a double seam. The pocket one side is seamed in the outer side seam. The single seam stitches slanted pocket flap is seamed to the front and back of the trousers. The pocket flap is 1-1 cm wider than the pocket on each side. The pocket flap slopes at least 45° towards the outside side seam. The front and back rise and the inside side seam is stitched with double seam. The bottom of the legs are stitched with a double turn-up.
